Siemens PLM Software 技術技巧及新聞

歡迎流覽 《Siemens PLM Software 技術技巧及新聞》,希望它能成為 Siemens PLM Software 技術支援團隊將 Siemens PLM Software 最新產品更新、技術技巧及新聞傳遞給用戶的一種途徑

Date: 2021/07/02

Teamcenter Tips

1. 在 Active Workspace 中無法搜索到資料夾

問題:

已經將 object_type 的兩個屬性常量 Awp0SearchCanFilter 和 Awp0SearchIsIndexed 設置為 true,然後成功部署了範本,但是指定的資料夾仍然無法搜索到。

軟體配置:

Product: TEAMCENTER Application: ACTIVEWORKSPACE Version: V5.1 Function: SEARCH

方法:

除了 object_type, 還需要設置 Folder 業務物件常量 Awp0SearchIsIndexed=true.

Business Object Constants Localization			
Business Object Constants			
Name	Value	Overridden	
¹ C Awp0SearchlsClassifyDataIndexed	false		
⁶ C ^{Awp0SearchIsIndexed}	true	-	4
Oc Awp0SearchRevRuleIsExported	false		
Aug OS asserbling up acted Paula Entries		The Chi Church	

保存修改後再次部署範本,然後按順序運行以下命令(在實際運行中把<infodba password>替換為對應的 infodba 帳號的密碼):

- 1. manage_model_files -u=infodba -p=<infodba password> -g=dba -syncToDb
- 2. bmide_generatetcplmxmlschema.bat -u=infodba -p=<infodba password> -g=dba
- 3. bmide_setupknowledgebase.bat -u=infodba -p=<infodba password> -g=dba regen=false

- bmide_modeltool.bat -u=infodba -p=<infodba password> -g=dba -tool=all mode=install -target_dir="%TC_DATA%" model_file=%TC_DATA%\model\model.xml
- 5. TcSchemaToSolrSchemaTransform.bat %tc_data%\ftsi\solr_schema_files

重啟 Solr 相關的服務後,可以成功執行搜索:

Carch Results Saved Advanced				Any Owner	Any Category	EdFolder
						Latest Working 👻
Filters	at with Search	Save Search		Overview		
	 nd in this content		Ø	▼ PROPERTIES		
Owner				Name:		EdFolder Bedit Lo
ed (ed) (1)	EdFolder	(ad)	D	Description		

2. 如何隱藏一個 PLMXML 傳遞模式

問題:

如何在胖用戶端隱藏一個 PLMXML 傳遞模式?

軟體配置:

```
Product: TEAMCENTER
Application: PLMXML
Version: V12.1
Function: IMPORT_EXPORT
```

方法**:**

請按照下面的步驟,通過基於物件使用權限的方式隱藏傳遞模式。

1. 通過名稱搜索出需要隱藏的傳遞模式

例如:ConfiguredDataExportDefault

SIEMENS

Siemens PLM Software

Greater China Technical Tips & News Hot Line:800-810-1970

2. 選擇搜索出的傳遞模式物件,點擊功能表 視圖>>訪問...

٢			Access		x
ConfiguredDataExportD	efault				
User: infodba (in	fodba) 🗸				
Croup: dba V					
S Group. Uba •					
Role: DBA Y					
Access of infodba (infodb	a) - dba/DBA				
Add Content	Administer ADA Licen	ses 🖹 Assign to Project	🐳 Batch Print	Shange	Change Ownership
Leck-In/Check-Out	Copy	* Create	× Delete	P Demote	2 Digitally Sign
e Effectivity	A Export	IP Administrator	🍫 IP Classifier	TAR Administrator	7 ITAR Classifier
Import	% Manage Variability	Markup	PDF Control	➤ Promote	Publish

ᢥ Transfer Out	Translation	🖹 Unmanage	🔏 Void Digital Signature	🖉 Write	E Write Classification ICOs
			Close	G	TMC Chooten
			cross	<u> </u>	

3. 點擊"獲取存取控制清單",添加指定的用戶,比如:U1,並且設置讀,寫和刪除的 許可權為否。

4. U1 用戶登錄後,檢查"ConfiguredDataExportDefault"傳遞模式在清單裡不可見。

3. 如何辨別兩個 BMIDE 範本的不同

問題:

如何來辨別兩個 BMIDE 範本來找出他們的不同呢?

解決辦法:

在 BMIDE 中,選擇功能表 BMIDE,然後選擇報告,選擇比較兩個資料模型

系統會提示使用者選擇比較什麼類型的資料範本,在該示例中選擇範本專案選項。

💇 Compare Models

Compare Models

Use this wizard to compare model elements between two data models. Start by selecting the type of source for input Data Model 1.

Template Pro	oject
A template proj compared to ot	ect is contained within your BMIDE Client. It contains a data model that can be her data models.
O Teamcenter S	Server
If you have netw latest data mod can be created i Connection Prof	vork access to a Teamcenter Server you can use a connection to download the el from the database. To connect to additional Teamcenter Servers, new profiles in the BMIDE Preferences: Window -> Preferences -> Teamcenter -> Server files. Click on the Connect button to establish the connection.
O Template Pag	skage
A template pack A template pack	kage contains the template file and dependency file for a given BMIDE template kage can be created in any BMIDE by using the Package Template wizard.
O Model File	
A model file is a can be obtained Teamcenter dat model.xml file f	an XML file that contains the complete data model for a Teamcenter Database. I in two different ways: by running the business_model_extractor utility on the abase to extract the complete data model in a single file, or by getting the rom the <tc_data>/model directory.</tc_data>
٦	

預設情況下,會在使用者選擇的路徑下生成一個 DataModelComparison.html 文件

DataModelComparison.html 檔會高亮顯示專案的不同,同時在 BMIDE 中也會呈現該報告。

用戶也可以使用該報告來驗證當前 BMIDE 專案和資料庫的不同,從而跟資料庫進行同步。
