

## Siemens PLM Software 技術技巧及新聞

歡迎流覽 《Siemens PLM Software 技術技巧及新聞》，希望它能成為 Siemens PLM Software 技術支援團隊將 Siemens PLM Software 最新產品更新、技術技巧及新聞傳遞給用戶的一種途徑

Date: 2019/06/21

### Tecnomatix Tips

#### 1. 由於 rrs.xml 文件的問題，導致 RCS errors。

問題/症狀:

由於 rrs.xml 檔的錯誤，導致我在 Robot Properties 中無法 validate RCS。

解決方法:

下面是一個能正常工作的 rrs.xml 檔，其中設置了 rj3\_rcs\_tune.exe 和 rj3\_rcs\_tune\_debug.exe 的路徑。

使用者可以根據下面的檔修改為自己實際的路徑：

```
<?xml version="1.0" standalone="yes" ?>
<Data>
  <ControllersData>

    <Controller Name="Fanuc-Rj">
      <InstalledVersions>

        <Version Name="standard">
          <ModuleName>D:\APPS\RCS_clients\rrs_bin\rscsfr13\robcad
            .bin\rj3_rcs_tune.exe</ModuleName>
          <ModulePathName>D:\APPS\RCS_clients\rrs_bin\rscsfr13\ro
            bcad.bin</ModulePathName>
        </Version>

        <Version Name="debugx">
          <ModuleName>D:\APPS\RCS_clients\rrs_bin\rscsfr13\robcad
            .bin\rj3_rcs_tune_debug.exe</ModuleName>
          <ModulePathName>D:\APPS\RCS_clients\rrs_bin\rscsfr13\ro
            bcad.bin</ModulePathName>
        </Version>

      </InstalledVersions>
    </Controller>

  </ControllersData>
</Data>
```

## Teamcenter Tips

### 2. 如何從查詢報告中匯出組和子組名字到 MS Excel ?

問題：

Teamcenter11.5 環境下，用戶使用查詢"\_\_web\_find\_user"來匯出 Teamcenter 使用者資訊到 MS Excel，但是面臨如下問題：

注意 Excel 的默認組不能像詳細視圖中那樣顯示完整的路徑/組名。

富用戶端："Subgroup1.Engineering"

Excel: "Subgroup1"

用戶有很多的位置和子組，因此當前的 Excel 的內容無法滿足使用者的需要。

富用戶端的結果是可滿足要求：

Name	Person	User ID	OS Name	Default Group	Default Volume
Administrator	Administrator	administrator	Administrator	Engineering	
CAMUser01	CAMUser01	camuser01	CAMUser01	Manufacturing	volume
dcproxy	dcproxy	dcproxy	dcproxy	dba	
Demo	Demo	demo	demo	dba	
infodba	infodba	infodba	infodba	dba	
MFGAdmin01	MFGAdmin01	mfgadmin01	MFGAdmin01	Manufacturing	
mwhitman	mwhitman	mwhitman	mwhitman	Subgroup1.Engineering	
Planner01	Planner01	planner01	Planner01	Manufacturing	volume
TOOLAdmin01	TOOLAdmin01	tooladmin01	TOOLAdmin01	Manufacturing	volume
ubu	ubu	ubu	ubu	Engineering	

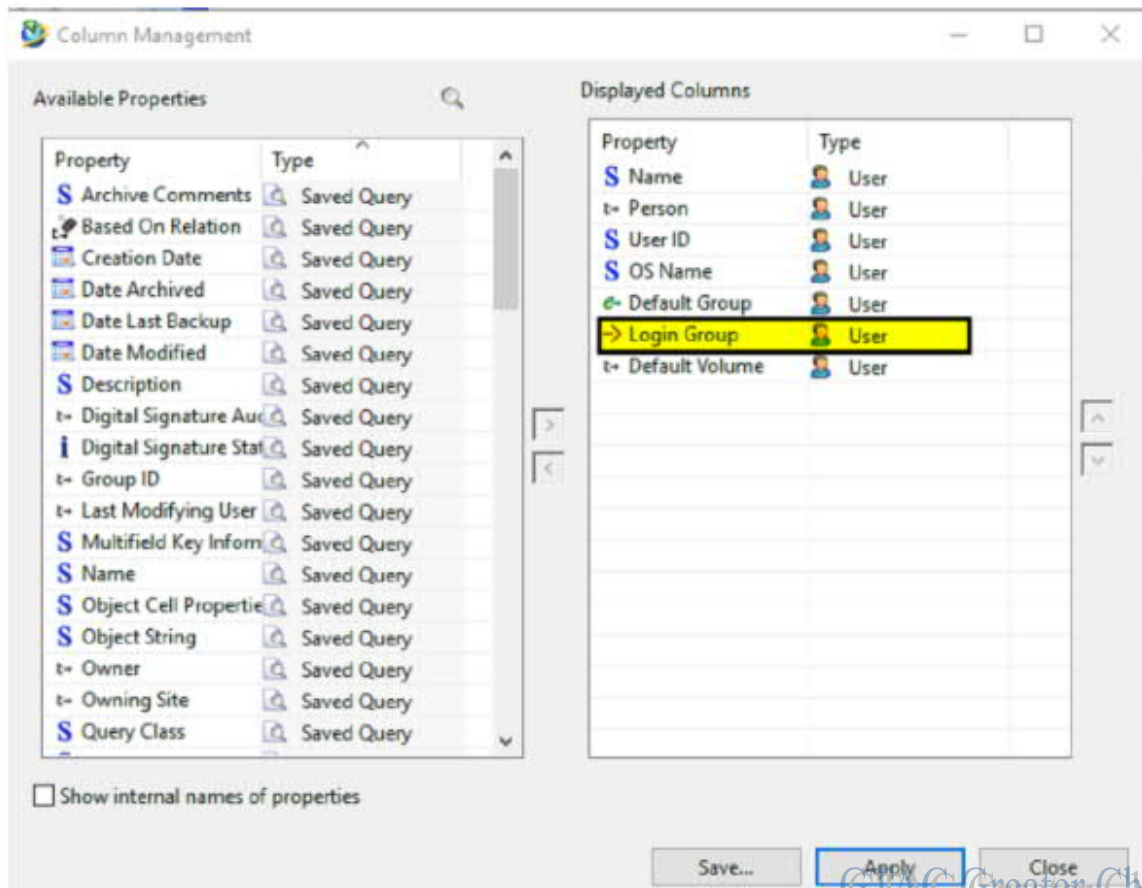

匯出到 Excel 的結果不滿足要求：

Home	Name	Person	User ID	OS Name	Default Group	Default Volume
1	Administrator	Administrator	administrator	Administrator	Engineering	
2	CAMUser01	CAMUser01	camuser01	CAMUser01	Manufacturing	volume
3	dcproxy	dcproxy	dcproxy	dcproxy	dba	
4	Demo	Demo	demo	demo	dba	
5	infodba	infodba	infodba	infodba	dba	
6	MFGAdmin01	MFGAdmin01	mfgadmin01	MFGAdmin01	Manufacturing	
7	mwhitman	mwhitman	mwhitman	mwhitman	Subgroup1	
8	Planner01	Planner01	planner01	Planner01	Manufacturing	volume
9	TOOLAdmin01	TOOLAdmin01	tooladmin01	TOOLAdmin01	Manufacturing	volume
10	ubu	ubu	ubu	ubu	Engineering	

如何可以看到完整的組/子組名，而不是僅僅顯示子組名？

## 解決方法：

可以使用列管理功能增加新的屬性“ 登陸組” 到詳細視圖中。  
增加列"登陸組" 。

在富用戶端中查看結果

The screenshot shows a rich client application window with a table of user data. The table has the following columns: Name, Person, User ID, OS Name, Default Group, Login Group, and Default Volume. The 'Login Group' column is highlighted in yellow. The data rows are as follows:

Name	Person	User ID	OS Name	Default Group	Login Group	Default Volume
Administrator	Administrator	administrator	Administrator	Engineering	Engineering	
CAMUser01	CAMUser01	camuser01	CAMUser01	Manufacturing	Manufacturing	volum
dcproxy	dcproxy	dcproxy	dcproxy	dba	dba	
Demo	Demo	demo	demo	dba	dba	
infodba	infodba	infodba	infodba	dba	dba	
MFGAdmin01	MFGAdmin01	mfgadmin01	MFGAdmin01	Manufacturing	Manufacturing	
mwhitman	mwhitman	mwhitman	mwhitman	Subgroup1.Engineering	Subgroup1.Engineering	
Planner01	Planner01	planner01	Planner01	Manufacturing	Manufacturing	volum
TOOLAdmin01	TOOLAdmin01	tooladmin01	TOOLAdmin01	Manufacturing	Manufacturing	volum
ubu	ubu	ubu	ubu	Engineering	Engineering	

## 匯出到 Excel

The screenshot shows the Microsoft Excel interface with a table containing user data. The table has columns for Name, Person, User ID, OS Name, Default Group, and Login Group. The data is as follows:

	Name	Person	User ID	OS Name	Default Group	Default	Login Group
1	Administrator	Administrator	administrator	Administrator	Engineering		Engineering
2	CAMUser01	CAMUser01	camuser01	CAMUser01	Manufacturing	volume	Manufacturing
3	dcproxy	dcproxy	dcproxy	dcproxy	dba		dba
4	Demo	Demo	demo	demo	dba		dba
5	infodba	infodba	infodba	infodba	dba		dba
6	MFGAdmin01	MFGAdmin01	mfgadmin01	MFGAdmin01	Manufacturing		Manufacturing
7	mwhitman	mwhitman	mwhitman	mwhitman	Subgroup1		Subgroup1.Engineering
8	Planner01	Planner01	planner01	Planner01	Manufacturing	volume	Manufacturing
9	TOOLAdmin01	TOOLAdmin01	tooladmin01	TOOLAdmin01	Manufacturing	volume	Manufacturing
10	ubu	ubu	ubu	ubu	Engineering		Engineering

## 匯出到 CSV 檔案格式

The screenshot shows the Microsoft Excel interface with a CSV file containing user data. The table has columns for Name, Person, User ID, OS Name, Default Group, Login Group, and Default Volume. The data is as follows:

	Name	Person	User ID	OS Name	Default Group	Login Group	Default Volume
1	Administr	Administr	administr	Administr	Engineering	Engineering	
2	CAMUser	CAMUser	camuser0	CAMUser	Manufacturing	Manufacturing	volume
3	dcproxy	dcproxy	dcproxy	dcproxy	dba	dba	
4	Demo	Demo	demo	demo	dba	dba	
5	infodba	infodba	infodba	infodba	dba	dba	
6	MFGAdmi	MFGAdmi	mfgadmin	MFGAdmi	Manufacturing	Manufacturing	
7	mwhitmai	mwhitmai	mwhitmai	mwhitmai	Subgroup1	Subgroup1.Engineering	
8	Planner01	Planner01	planner01	Planner01	Manufacturing	Manufacturing	volume
9	TOOLAdm	TOOLAdm	tooladm	TOOLAdm	Manufacturing	Manufacturing	volume
10	ubu	ubu	ubu	ubu	Engineering	Engineering	

成功！匯出到 Excel 後，登陸組列提供了完整的組/子組資訊。

### 3. 如何通過 Foundation Viewer 在 Adobe Reader 中顯示 PDF ?

#### 軟體配置：

OS: Window Server 2012 R2

Product: TEAMCENTER 11.6

Application: PORTALVIEWER

#### 問題：

用戶希望通過檢視器 Foundation Viewer, 在 Adobe Reader 中查看 PDF 資料集。

#### 方法：

下載並安裝 Adobe Reader XI 11.0.10 64bit。

修改首選項 "defaultViewerConfig.VIEWERCONFIG"，並添加值：

"PDF.HTMLViewer=PDF\_Reference,PDF"

重啟 Teamcenter 並刪除 RAC 緩存，選擇一個 PDF 資料集，PDF 將會通過檢視器顯示在 Adobe Reader 中。
