

Siemens PLM Software 技術技巧及新聞

歡迎流覽《Siemens PLM Software 技術技巧及新聞》，希望它能成為 Siemens PLM Software 技術支援團隊將 Siemens PLM Software 最新產品更新、技術技巧及新聞傳遞給用戶的一種途徑

Date: 2016/09/02

Teamcenter Tips

1. 設置調度郵件通知

系統組態有郵件通知功能，可以針對失敗的調度任務發送郵件，通知管理員。下面是相關的設置步驟。

需要編輯檔 tc_dispatcherClient\conf\Service.properties

編輯如下 E-MAIL 項

```
#####
#
#   E - M A I L
#
#   The following are the recognized Dispatcher Client e-mail properties:
#
#   Name           : Service.Email.AdminEmailId
#   Description    : Administrator e-mail addresses to receive notification.
#                   specified e-mail inbox
#   Value          : One or more valid, comma delimited, e-mail addresses. If a
#                   different address delimiter must be used, it must be specified
#                   as the Service.Email.AdminEmailIdDelimiter property value.
#
#   Service.Email.AdminEmailId=helpdesk_cn.plm@siemens.com
#
#   Name           : Service.Email.AdminEmailIdDelimiter
#   Description    : The delimiter used for AdminEmailId property value.
#   Value          : A valid delimiter character
#   Default value : ,
#
#   Service.Email.AdminEmailIdDelimiter=,
#
#   Name           : Service.Email.SMTPServerName
#   Description    : Server used for basic text messaging
#   Value          : A valid IP address of the SMTP Server
#
#   Service.Email.SMTPServerName=smtp.siemens.com (valid SMTP mail server)
#
#   Name           : Service.Email.SendUserEmailOnError
#   Description    : 0 = off
#                   1 = Turn on e-mail based notification for Teamcenter users
#                   that create translation requests. When a translation
#                   error occurs, e-mail will be sent to the e-mail address
#                   specified for the user that owns the translation
#                   request.
#   Value          : 0 or 1
#
#   Service.Email.SendUserEmailOnError=0
#
#   Name           : Service.Email.SenderId
#   Description    : All administrator and user error notifications sent via e-mail
#                   will use this value as the e-mail sender address.
#   Value          : A single valid e-mail address.
#   Default value : The Dispatcher Client name.
#
#   Service.Email.SenderId=helpdesk_cn.plm@siemens.com
#
```

```
# Name      : Service.Email.EmailSubjectPrefix
# Description : This set of characters is prepended to the subject
#             of the e-mail
# Value     : String
#
Service.Email.EmailSubjectPrefix=[TS_ERROR]
```

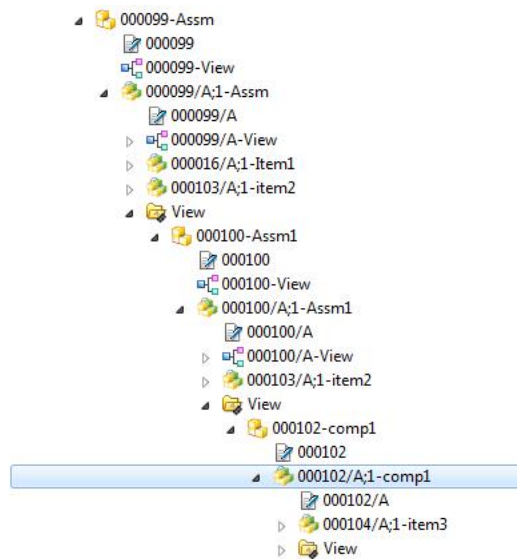

注意

- 必須為有效的郵寄地址
- 使用 `Service.Email.EmailSubjectPrefix=[TS_ERROR]` 參數來設置產生的郵件主題首碼，從而在郵件應用中可以搜索和過濾
- `Service.Email.SendUserEmailOnError=1` 將為管理員(`Service.Email.AdminEmailId` 所指定的郵寄地址)和調度請求創建者(觸發調度/任務的者)生成郵件

2. 如何在匯出 BOM 到 excel 的同時匯出引用的零元件版本相關的資訊

在結構管理器中使用工具-->匯出-->物件到 Excel 命令匯出裝配資訊時，通常只能夠匯出裝配行相關的資訊，並不能匯出裝配行對應的零元件版本引用的其他資訊。

比如

GTAC Greater China

Structure Manager					
000099/A;1-Assm - Latest Working - Date - "Now"					
BOM Line	Item Type	Rule configured by	Item Rev Status	Find No.	Mak...
000099/A;1-Assm	Item				
000100/A;1-Assm1	Item	Working ()	10		e
000102/A;1-comp1	Item	Working ()	10		e

GTAC Greater China

000016/A, 000103/A 和 000104/A 不在裝配中，但是被裝配行對應的零組件版本所引用。

希望在匯出裝配資訊的同時也匯出他們的資訊
主要有 3 個步驟

1. 創建遍歷規則和傳遞模式

ClosureRule

Traversal Rule Name: BOM_ItemRevision *

Description:

Scope of Traversal: Export Import

Output Schema Format: PLMXML

Primary O...	Primary O...	Secondary...	Secondary Object	Relation Type	Related Property Or Object	Action Type	Condition...
CLASS	BOMLine	TYPE	*	PROPERTY	bl_revision	TRAVERSE	
CLASS	ItemRevision	CLASS	ItemRevision	RELATIONP2S	IMAN_reference	PROCESS	

GTAC Greater China

TransferMode

Name: BOM_ItemRevision *

Context:

Description:

Type of Transfer: Export Import

Output Schema Format: PLMXML

Support Incremental

Closure Rule: BOM_ItemRevision

Filter Rule:

Property Set:

Revision Rule:

Action List:

List of defined tools

List of selected tools

GTAC Greater China

2. 創建新的 excel 範本

Type	Name	Desc	ID	Owner	Find Number	Group	Level	Relator Type	TransferMode
<start>	Usage Tips: 1.All the content above the <start> tag will be considered as header or constant information. But if the header cell has a format (%Real Property Name), then its value will be replaced by Display Name of that property during sheet generation. 2.The yellow column indicates the start of 'Rules'. 3.The 'Rules' should be written in the required order of precedence. 4.The Properties table on the left will specify the properties to be exported for each matching rule. 5.The rule table in the template is not exported to the spreadsheet. 6.Apply Style information to cells as desired. This style information is not exported to the spreadsheet.								
{	{%bl_item_obje	{%bl_rev_object	{%bl_rev_object	{%bl_item_	{%bl_item_owning	{%bl_sequence_n			{%T-
	ct type}	name}	desc}	item id}	user}	o}			BOM_ItemRevision}
	{%object type}	{%object name}	{%object desc}	{%item id}					
}	All the content below the <end> tag will be considered as footer or constant information. You can insert images or any other content you would like to be exported.								
<end>									

GTAC Greater China

3. 匯出並選擇定制化的 excel 範本

	A	B	C	D	E	F	G	H
1	Siemens PLM Software							
2	Teamcenter Excel Export							
3	"Live" edit on this spreadsheet requires Teamcenter Extensions for Microsoft Office							
4								
5	Type	Name	Desc	ID	Owner	Find Number	Group	
6	Item	Assm		000099	demo (demo)		dba	
7	Item Revision	item1		000016				
8	Item Revision	item2		000103				
9	Item	Assm1		000100	demo (demo)	10	dba	
10	Item Revision	item2		000103				
11	Item	comp1		000102	demo (demo)	10	dba	
12	Item Revision	item3		000104				
13								
14								

Tecnomatix Tips**3. Tecnomatix 在 windows 10 環境中崩潰**

問題/症狀

Tecnomatix 在 windows10 環境中崩潰.

解決方法

Process Simulate 12.1 版本不支援 windows 10. 這個版本可以在 windows 7 上運行.

從 Tecnomatix 13 版本開始 支持 windows 10 上運行.
